Marketing Metrics and Decisions - 2

2627-2-E1806M012-E1806M012-2-T2

Learning area

Business Management

Learning objectives

Marketing Metrics is a module in the Marketing course (13 credits – Fundamentals of Marketing I 8 credits and Marketing Metrics for Decisions 5 credits).

The course's objective is to provide a broad and in-depth overview of the main methods, techniques, and metrics for measuring, evaluating decisions, and analyzing marketing performance. All these elements provide the tools to evaluate the returns on marketing investments and, ultimately, the contribution of marketing to corporate value creation.

The course provides students with an in-depth framework of specific indicators and methods to adequately measure and evaluate marketing returns in the broader business value generation process.

In relation to the Dublin Descriptors, the learning objectives aim to ensure that students acquire:

- Knowledge and Understanding: Knowledge and understanding of marketing metrics that extend and/or strengthen marketing metrics and enable the analysis of marketing indicators and decision-making;
- Applied Knowledge and Understanding: Ability to apply acquired knowledge, understanding, and marketing metrics skills to solve problems learned during the course to new or unfamiliar topics, within broader (or interdisciplinary) contexts;
- Judgment Skills: Ability to integrate the marketing metrics knowledge listed above to manage complexity, as well as to make judgments based on limited or incomplete information;
- Communication Skills: Ability to clearly and unambiguously communicate their marketing metrics analysis conclusions to multiple audiences;
- Learning Skills: Development of learning skills that enable continued monitoring and retrieval of updated information and data, primarily in a self-directed or autonomous manner.

In terms of Knowledge, Skills, and Competencies, the objectives are to achieve a certain level of preparation in the Marketing Metrics for Decisions topics mentioned above, broken down into:

-Knowledge: Knowledge of the main marketing metrics for the market, profitability, consumers, and operational marketing levers.

-Skills: Ability to analyze marketing strategy management problems, develop new knowledge and procedures, and integrate knowledge gained from different fields.

-Competencies: Ability to evaluate marketing decisions, manage work or study contexts, and contribute to operations.

Contents

The course aims to analyze the main metrics for evaluating marketing strategies in order to evaluate and inform marketing decisions. Specifically, marketing metrics related to market research, consumers, marketing and product profitability, pricing, distribution, social media, and communications will be examined.

Detailed program

- Performance Measurement and Marketing Metrics
- Marketing Metrics and Value Creation Decisions: Marketing Profitability Metrics
- Customer Analytics and Metrics: Customer Acquisition, Customer Value, Customer Metrics
- Product and Portfolio Management Metrics (Product Metrics)
- Sales Force and Distribution Channel Evaluation Metrics
- Price Strategy Evaluation Metrics (Price Metrics)
- Digital Marketing Metrics & Social Media Marketing Metrics
- Marketing Communication Metrics

Prerequisites

- Background in market-driven management
- For Erasmus students: basic knowledge of market-driven management

Teaching methods

Lectures:

- 8 lessons - 2 hours (excluded one lesson of 1 hour) with teaching in class
- 10 lessons - 2 hours where the first part will be of explanations, and the second part interactive with students.

Lessons in class.

The lessons are for students of T2 (surname Li-Z).

Teaching language: Italian

Semester: 1

Assessment methods

At the end of the course, students attending the course will have the opportunity to take a written exam based on the material covered in class (along with Fundamentals of Marketing) and the additional reading material indicated during the course. The written exam will consist of open-ended questions (expositions of topics covered in class or in the indicated reading material) and/or closed-ended questions (multiple choice questions) and exercises.

In official SIFA exams, the exam is oral, based on the reading material indicated on the course page, to test knowledge of the topics and the ability to reflect on critical points of the syllabus.
