UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Geological Survey

2627-2-E3402Q012-E3402Q01201

Aims

Recognition of geometry and compositional characters of geological bodies, and their description in the field.

Contents

Introduction to field geology and mapping.

Detailed program

Field geology techniques: Description and classification of sedimentary, igneous and metamorphic rocks in the field. Quaternary deposits. Compass and basic stereonet techniques. Plotting contacts on base maps. Stratigraphic polarity in deformed successions. Stratimetric problems. Data collection and making standard geological maps. Stratigraphic logs and geological cross-sections from field data. Preparing geologic reports.
Field work: Two daily field excursions aimed at the recognition and mapping of sedimentary covers and crystalline basements.

Prerequisites

Having obtained 1 cfu relating to the Safety Course in the field

Teaching form

20 two-hour lectures, in person, Delivered Didactics
2 six-hour field activities, in person, Interactive Teaching

Textbook and teaching resource

Notes provided by the lecturers

Semester

second semester

Assessment method

There are no *in itinere* tests. For the exam, refer to the syllabus of the course E3402Q012 Field Geology and Mapping.

Office hours

Website: www.disat.unimib.it in teaching area you can find information about teachers cv, telephone number, University room or other place of work, office hours and e-mail.
