COURSE SYLLABUS

Sociology

2627-1-I0104D006-I0104D00601

Aims

Sociology

These Lectures aim to introduce students to the comprehension of some basic processes of sociology. Society is an ‘artificial’ entity coming from conventions, routines and behavior patterns; it deals with the ‘reality’ of life day by day. So, this explains why we are interested in focusing on the dimension of everydayness. Finally, the lectures end with a special consideration of the relation between social inequalities and people’s health.

Contents

History of sociology
Perspectives on sociology
Health inequalities
Social determination of health

Detailed program

Prerequisites

No specific prerequisite

Teaching form

Lectures (60%), Interactive teaching (40% with group work and discussions about specific topics of sociology of health)

Textbook and teaching resource

Neresini F., Bucchi M., 2001, Sociologia della Salute, Carocci, Roma (chosen chapters).
