

UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Tecniche Radiologiche Contrastografiche Planari

2627-1-I0304D005-I0304D00506

---

#### Aims

The course aims to provide students with theoretical and practical skills, and basic techniques to execute contrast X-rays investigations, using direct techniques.

#### Contents

The student will be required to demonstrate his/her knowledge of the contrastographic techniques and methodologies illustrated in class, with particular attention to the definition of the correctness criteria in carrying out a radiological examination. He/she must also have acquired the necessary skills regarding the definition of normality and pathology of the organs and anatomical structures treated during the course

#### Detailed program

Contrast media for planar radiological use  
Contrastographic techniques in the study of the urinary and genital systems  
Contrastographic techniques in the study of the gastrointestinal system

#### Prerequisites

Organs and Functions

## **Teaching form**

4 lessons of 2 hours carried out in attendance in both frontal/interactive modality with practical activities for students

## **Textbook and teaching resource**

F.MAZZUCATO: "Anatomia Radiologica. Tecniche e Metodologie in Radiodiagnostica" Ed.Piccin

Teacher will provide other educational material.

## **Semester**

Second semester

## **Assessment method**

Oral test to evaluate preparation on the teaching programme, and the ability to organize knowledge in a short discussion and to properly use the technical language.

## **Office hours**

By appointment required by mail

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING | QUALITY EDUCATION
