SYLLABUS DEL CORSO

Introduzione al Management Infermieristico

2627-1-K0102D004-K0102D00405

Aims

The course aims to provide students with the basic knowledge required to understand and analyse healthcare organisations, identifying the various factors that influence their functioning. Within this organisational context, the managerial function is examined as a process through which managers can and must foster alignment between professional values and those of the healthcare organisation, thereby promoting the achievement of both professional and institutional objectives.

Contents

Analysis of the organisation according to H. Mintzberg's model. Understanding the basic principles of organisational design. Distinguishing between organisational systems based on the technical model and the professional model.

Detailed program

Understanding the basic principles of organisational design. Distinguishing between organisational systems based on the technical model and the professional model. The departmental organisational model: roles, activities and types of departments.

Prerequisites

None
