COURSE SYLLABUS

Elements of Midwifery for a Collaborative Leadership

2627-1-K0102D005-K0102D00504

Aims

The course aims to provide students with theoretical and practical knowledge of midwifery leadership, examining key leadership models as well as the managerial and interpersonal skills required to manage work teams and multi-professional care processes.

Contents

Introduction to midwifery leadership and key theoretical models. Leadership and management competencies. Leadership in multi-professional teams. Leadership focused on quality, patient safety, and organizational development.

Detailed program

The course will examine in depth the theoretical foundations of leadership and their application within care and organizational settings. Key leadership models and their impact on organizational and care outcomes will be analyzed. Furthermore, the course will explore the role of the midwife leader in managing change, promoting evidence-based practice, developing staff competencies, ensuring quality and safety of care, facilitating clinical governance, and continuously improving organizational performance.
