

Topics of chemistry and physics for students that don't have a Materials Science background

Here are listed the things you need to learn in order to have an easier time studying for your exams.

If you need further explanations, you can make an appointment with the professors writing them an email.

- **For students with a chemistry degree:**

The main topics of physics you need to learn are listed in the pdf documents prepared by prof. Montalenti.

Prof. Montalenti: francesco.montalenti@unimib.it

- **For students with a physics degree:**

All the topics you should know can be found in the book "**Thermodynamics of solids**", by **Richard Swalin** which can be found in the scientific library (U2 building – 2nd floor).

Prof. Narducci: dario.narducci@unimib.it
