

# Practical internship (TPV)

From this academic year, AEPS turns to a professionalizing Master's degree structure.

This means that graduates can practice as a professional psychologist without the need of pursuing internship activities after the graduation!

To practice as a professional psychologist, students must have carried out a practical traineeship (TPV) during the Master's degree for a total of 30 credits (CFUs).

## Questions from the students?

Can I do the 14 external internship abroad / within an Erasmus program?

How many hours of external intership can I do in each week?

Can I get paid during the external intership?

Can a working/internship activity I have done before AEPS, or I am doing right now, be used as part of the external internship?
