# Milano Chemometrics and QSAR Research Group

Le tesi di laurea sono svolte in relazione ai progetti di ricerca del gruppo:

- sviluppo di nuovi metodi **chemiometrici**
- applicazioni **QSAR/QSPR** su risposte di interesse ambientale, biologico, farmacologico e tossicologico
- applicazioni chemiometriche su ***big data* di natura analitica**
- sviluppo e ottimizzazione di metodi innovativi di microestrazione/campionamento da matrici complesse attraverso tecniche «**green**»
- Studio della fotodegradazione di **contaminanti organici** potenzialmente tossici e stima dei loro tempi di semi-vita mediante sviluppo di metodi analitici

tossici e stima dei loro tempi di semi-vita in  
ambiente acquatico mediante metodi  
chemiometrici**

# Milano Chemometrics and QSAR Research Group

Le tesi possono essere:

- Interne
- Estero mediante Erasmus Traineeship
  - Università (Spagna, Olanda, Slovenia, Danimarca, etc...)
  - Industria

Competenze acquisibili:

- acquisire principi **teorici** e **applicativi** della chemiometria/machine learning
- acquisire competenze **analitico-strumentali** su tecniche di trattamento del campione/cromatografia/spettrometria di massa
- utilizzo avanzato software per l'analisi dati
- programmazione (eventuale)
