**Presents the volume:**

*Sustainable Tourism across the Mediterranean Basin.  
Stakeholders' visions in Malta and Sardinia*

Franco Angeli, 2020

The book analyses the environmental, social and economic impact of tourism in the islands of Malta and Sardinia. The main objective of the essay is to give an overview on tourism in those islands, through a survey conducted on more than 40 local operators, in order to identify the specific features that characterize sustainability and unsustainability of human development. Moreover, the book highlights the role of innovative and transformative enterprises, while proposing recommendations to the stakeholders.

Hosts: Stefano Malatesta and Pietro Piana, *Coastal and Maritime Tourism*
