

R PROGRAMMING LANGUAGE

(ADDITIONAL REFERENCES)

Furthermore, if you want to know something more on the R programming language and you want to program yourself in R using the KNIME software platform we suggest the following additional material;

- [Getting Started With R](#)
- [Creating Vectors, Matrices](#)
- [Import Data, Copy Data from Excel to R](#)
- [Importing Data](#)
- [Working with Variables](#)
- [Subsetting Data in R](#)
- [Logic Statements \(TRUE/FALSE\)](#)
- [Setting Up Working Directories in R](#)
- [Tutorial R](#)
- [DataCamp](#)
- [Commands](#)

(*) However, once more we want to stress that you are not required to develop R programs to learn and develop the topics of the course.

In case you experience problems with the above, please send an email to stella@disco.unimib.it using the subject “DMCA – R language issue”.
